

About home style

Room with a view

by Stacy Holder

I meet clients daily who are excited to have new windows, but disappointed when their window coverings aren't compatible. They have to settle for a different look. Here are some tips to avoid disappointment and save you money.

- » Know your window covering options before purchasing new windows. I can come to your home for a free consultation, or I invite you to visit our showroom.
- » Ask how much window depth you currently have and how much you will lose with the new window. Is the new window vertical or horizontal? Cranks are a great feature, but be sure you have enough depth for your window coverings to fit.
- » Remember there are different types of windows, horizontal and vertical. Let us help find the window coverings that work best.

Window coverings are an investment and a home interior feature that will last for years. I hope these tips will eliminate disappointment and save you money.
